

し · shi

Shi in hiragana is し: one stroke down, then round and up to the right, unlike つ and も.

Writing model

Write it, stroke by stroke.

1. Starts left of center, near the top; straight down, round, then up right. — sweep (はらい)

Watch for: Curving too soon, above the middle of the box, so the curve takes up most of し. **Fix:** Come straight down past the horizontal center line first, then curve round and sweep up to the right, as in the model.

いし · ishi · stone

しお · shio · salt

おかし · okashi · sweets; snacks

Trace, copy, then cover the model and write from memory.
